

# LITTLE BLUE NRD GRASS DRILL GUIDANCE SHEET

*12' Miller*

Total Width: 14'

Seeding Width: 11.66'

Row Spacing: 7" x 20"

Lift: Hydraulic

Towing: Donahue Trailer with pins

*2008 12' Strobel Industries*

Total Width: 14'

Seeding Width: 11.66'

Row Spacing: 7" x 20"

Lift: Hydraulic or Hand Ratchet

Towing: Strobel Trailer with 2 5/16' Ball (supplied) or receiver adapter hitch

The drills have two seed boxes. The larger box is for fluffy native grasses (Indiangrass, big and little bluestem, side-oats grama, wheatgrass, etc.); larger cool season grass (brome, orchard, buffalo); small grains (oats or wheat as cover crops).

The smaller box is used for legumes and alfalfa; reeds canary or switch grass seed if kept separate when planted as part of a native grass mixture.

Both drills have slide guide settings for the small and large boxes. The seeding chart is found on the inside of the cover lids.

**For availability and current rental price contact the NRD office at 402-364-2145**

**A signed Equipment Use Agreement & Release form is required before the drill may leave the NRD premises**

**A \$500 deposit check made out to the Little Blue NRD is required as security for the equipment when the drill is picked up.**

## Strobel Grassland Drill and Trailer Information

A 2 5/16" ball and receiver adapter hitch (supplied by the NRD) is required on the pickup to operate this unit. If this hitch is not returned with the drill there will be a \$40 fee assessed to the renter of the drill.

### Unloading drill from trailer instructions

- Position drill on the level near where it will be used
- Block wheels with provided wheel stops in front of the trailer axles (figure 1)
- Remove the four pins on the trailer deck, two pins per side (figure 2)
- Pull trailer forward until trailer drops down (figure 3)
- Remove a big pin by receiver hitch (figure 4)
- Again pull trailer forward and deck will be flat on the ground (figure 3)
- Unfold trailer ramps and hook up tractor to drill (figure 5)
- Remove tongue support and wheel straps (figure 6 & 7)
- Pull drill off trailer
- **Be extremely careful!**

### Reloading instructions

- Reverse unloading instructions, but place wheel stops **behind** trailer tires
- Be sure the wheel packers on the back of the drill will clear the left-hand side of the trailer tire
- **Failure to do so will result in full payment of repair to any damaged packer**
