## **PRE-APPLICATION FOR A PERMIT** TO CONSTRUCT AN IRRIGATION WATER WELL IN THE LITTLE BLUE NATURAL RESOURCES DISTRICT

The Little Blue NRD has implemented a ranking system which will be applied to irrigation well permits. This process is intended to assist the District in protecting the water groundwater resources, reduce irrigation runoff and minimize conflicts between groundwater users. All sites will be evaluated for aquifer and soils conditions. Conditions, or best management requirements, may be applied to permits which score below a minimum value for either the aquifer or soils evaluation. Because the time for the evaluation may require more than the 30 days allowed by law for approval of a permit, this pre-application process will help to prevent well permits from being filed which may have to be returned unapproved.
