

Signage Requirements for Crystal Lake –Agenda Item # 16

Project Implementation Plan calls for three (3) signs to document participants and environmental benefits of the project. This is a required condition under the terms of the contract for educational purposes.

The signs will discuss 1) wetlands, how they work, their benefit to the environment; 2) describe the District's Watershed Plan and the activities that are to be accomplished through it; and 3) the effects for water quality, the environment and recreation opportunities.

The cost of the signs is covered 100% by the participating 319 Water Quality Funds up to \$10,000

Dylan sent out a request for quotes and received only one proposal from **Precision Signs and Graphics of Bruning:**

The cost of the three signs would be **\$6,999**, constructed, painted and installed with crushed rock used to support and around the base of the sign; or **\$8,664** constructed, painted and installed with concrete used to support and around the bases.

See next page for style of sign board.
