

Agenda Item #2

Transfer Request

From SW $\frac{1}{4}$ 04-2N-02W irrigation wells G-141191 & G-141193 to the S $\frac{1}{2}$ NW $\frac{1}{4}$ 04-2N-02W.

Karl Wiedel owns the SW $\frac{1}{4}$ 04-2N-02W and irrigates 57 acres with pivot (in yellow). He has the opportunity to purchase the S $\frac{1}{2}$ NW $\frac{1}{4}$ 04-2N-02W, if he does he'd like to install a quarter swing pivot to irrigate approximately 33 acres from the wells on his quarter. The soils score 33.12 on the receiving tract, the aquifer score for the existing wells score 49.69. On the well registration each well is registered at 200 gpm. For the last 3 years Mr. Wiedel has applied 4.5, 4.2, and 3.9 inches per acre on his pivot irrigated field.

Totally un-related to the transfer request, but it may be called to the board's attention, this request lies about one mile from the location of the recent Landon Heinrich's test pump.
