

Mike Drohman owns the SE 36-03-05W and gravity irrigates the southeast pivot corner. He recently purchased the NW 06-02-04W, which is pivot irrigated, and requests a groundwater transfer permit to move irrigation water from 36 to 06. He intends to trench underground to the pivot point in 36 and under the road to 06 and pivot irrigate the corners of each pivot. The aquifer ranking for the existing well G-028288 is 160.52. As the transfer meets all requirements in the rules staff recommends approval.
