

Apex Clean Energy – Big Allis Solar Project Review

Projects & Planning Committee

~~13a) Motion to Approve Striking Sentence #4. ‘The NRD would be responsible for overseeing and monitoring the land and/or waterways to avoid hazards with soil erosion and water drainage.’~~

9. **For any development over 150 kW:** The applicant shall hold a ‘review meeting’ with the local Nebraska Natural Resources District (water and soil conservation agency). Little Blue NRD and Upper Big Blue NRD are located within Clay County, Nebraska. The local NRD (Nebraska Natural Resources District) would provide guidance regarding any impact on the waterways and/or possible soil erosion created by a large solar development. The NRD would be responsible for overseeing and monitoring the land and/or waterways to avoid hazards with soil erosion and water drainage. Clay County Governing Body (Board of Supervisors) may require other testing and safeguards such as soil testing, water testing, etc.
